ATIB is one of the renowned supplier of battery chargers for forklift, cleaning machines, scissor lift and electrical vehicles OEMs Applications for automotive, stationary and solar market.

- Standard Chargers line
- HF line
- Dc/Dc Converters
- Special KIT for charger service

JUNGHEINRICH BATTERIES

Power & Performance

Reliably high performance thanks to a more constant voltage curve than lead-acid batteries. The increased efficiency in comparison with conventional technologies significantly reduces energy costs and CO2 emissions. More efficient recuperation (energy retrieval when braking).

High truck availability

Fast and opportunity charging during breaks and downtimes for a 24/7 availability of trucks and flexibility in your warehouse. Within 30 minutes of charging the 24 Volt battery absorbs 50 percent of its capacity. After 80 minutes it reaches its full charge status.

Zero maintenance

FLithium-ion batteries are absolutely maintenance-free and do not emit gas.

That largely eliminates the costs of battery up keeping, maintenance and infrastructure.

No water refilling.

No risks or odors due to escaping gas or acidification.

No need for special charging areas with ventilation.

No expensive battery changing systems with their heavy drain on time and human resources.
